

# The Magic Of Blue Hour

# What is Blue Hour?

Blue Hour is simply the time of day before sunrise and after sunset when the atmosphere has a deep, dark blue color.

It is not exactly an hour, and its length depends on your latitude, time of year, and weather conditions.

# Why do I like shooting during Blue Hour?

The lights and colours are very mesmerizing during Blue Hour.

Long Exposure photography can capture effects such as star bursts, light trails, etc.

# Before The Shoot

- Shooting Location information
- Lenses
- Batteries
- Disks
- Camera Settings
- Camera Wireless Control
- Tripod and Tripod Mount
- Camera Raincoat/Plastic Bag with Rubber Band
- Mini Flash Light
- Fully charged cell phone
