Network or Portable
Drive

Cloud Service

BACKUP LOCATIONS

MY BACKUP SYSTEM

1 Local Computer

- A card reader is used to transfer the photos to local computer hard drive.

2 Connected Storage GoodSync

- Goodsync, (software) - used to automatically copy photos to Network Drives weekly. @\$22.50/yr

3 Cloud Service Backblaze

- Backblaze – unlimited storage, running continuously @\$7.50/month

MY PHOTO STORAGE SUMMERY

From the Camera

- Card is removed
- A Card reader is used to copy the photos to the computers hard drive.
- Photos then automatically backed up to the cloud service (Backblaze).
- Photos are also copied weekly to the storage drive, using “GoodSync” software.

THANK YOU
